At the Project

Site: Look for the City van and request to speak to the City inspector who will be on site during construction.

Project Overview

In March 2010 through approximately November 2010, construction will take place on the West Stadium (Suffolk to Hutchins) Improvement project. Funded in part through the Street Resurfacing Millage, this is a continuation of the work completed at and west of Pauline Blvd. This letter is intended to inform you about planned street improvements in the area where you live or work, project timeline and how you can access more information.

The project will include:

- Complete reconstruction of the street;
- 4 to 3 lane conversion (between Suffolk and Franklin) with on-street bike lanes on both sides;
- New large-capacity storm sewer pipes to provide detention and improved water quality downstream;
- Removal and replacement of the existing street trees;
- New water main to replace the existing water distribution pipes
- New sidewalk ramps and LED energy efficient street lights.

Detour Route

One lane of westbound traffic will be maintained through the construction zone.

Eastbound traffic will be detoured westbound on Pauline Blvd to southbound on Maple Rd to eastbound on Scio Church Rd to northbound on Main Street.

Seventh Street will remain open for the majority of the project. From mid-July to September 2010, part width construction at the intersection will require various traffic control switches. For detour maps, visit the website: www.wsb.org
