

East Stadium Bridges Replacement Project

SPRING 2011 PUBLIC INFORMATION MEETING

Construction Plan Details and Construction Operations

Planning for the replacement of the East Stadium bridges over South State Street and the Ann Arbor Railroad originally began in 2007 as part of a larger project.¹ Given the increasing urgency of replacing the bridge over South State Street, the project was re-defined in 2009 to include ONLY the replacement of the bridges and improvements in the immediately adjacent area. In December 2009, the preliminary design was presented and the public was invited to provide input on options for the visual character of the project design elements. This information was used to develop construction plans.

Construction plans are now virtually complete. The community is invited to an information meeting on project funding, construction plan details and construction period operations. Please join us.

What: *Information Meeting*

When: *Wednesday, March 23, 2011, 6:30 pm - 8:00 pm*

Project progress report

- Funding
- Construction Plan Details
- Construction Period Operations

Open house Q & A

Where: *Pioneer High School Cafeteria*

Enter at flag pole or clock tower doors
